

## Seminar on *ISO 9001 & ISO 14001 Revisions* Held successfully

The next revision to ISO 9001 and ISO 14001 will bring about further alignment between the structure and content of these two quality and environmental management system standards, and will give rise to significant changes in the ways in which organisations implement while certification bodies audit their management systems.

To provide insights into the revision, HKQAA held a seminar on “ISO 9001 & ISO 14001 Revisions – What Changes Will Be and Why?” on 29 November and 1 December 2014 at the Open University of Hong Kong and the Hong Kong Science Park respectively. The speaker was **Dr Nigel H. Croft, Chairman of ISO Technical Subcommittee on Quality Systems (ISO/TC 176/SC2)**, who is recognised as one of the world's foremost experts in quality management and conformity assessment of management systems. The two seminars received overwhelming response and attracted over 600 attendants in total.
