

## Green Estate Registration Scheme

*Showcase Contributions to Environmental Protection and Waste*

*Reduction at Source*

To keep pace with industry needs and developments in society, HKQAA has developed a “**Green Estate Registration Scheme**”. The Scheme encourages property management companies and housing estates to enhance their performance in environmental protection and in reducing waste at source, and recognises their efforts in these areas. Our ultimate goal is to promote environmental protection at the neighborhood level and enhance public awareness of environmental protection, thereby supporting Hong Kong’s development into a green city.

Property management companies and housing estates are eligible to apply for the Scheme. Participants need to fulfill requirements stated in the Green Estate Registration Scheme Handbook.

The Scheme helps participating organisations/ estates to practice effective waste management. They can also use the registration mark to enhance image and showcase commitment to environmental protection.
