Conversion Arrangements for ISO 50001:2018
Energy Management System

The International Organization for Standardization (ISO) officially released ISO 50001:2018 on 21 August 2018. This is the international management system standard in the field of energy management. It specifies the requirements for organisations to establish an Energy Management System (EnMS) to enhance their overall energy performance related to energy efficiency, energy use and energy consumption.

As per International Accreditation Forum (IAF) Resolution 2017-14, ISO 50001:2018 will replace ISO 50001:2011. A 3-year conversion period from the publication of ISO 50001:2018 has been agreed for ISO 50001:2011 certifications to convert to ISO 50001:2018 certifications.
